REVENING HORDES Book

Warhammer: The Old World - Ravening Hordes is your indispensable guide to the forces of evil in the World of Legend.

This book, used in conjunction with the *Warhammer: the Old World Rulebook*, provides you with all the information required to command your collection of miniatures on the field of battle.

Inside this 160-page hardback book you will find army lists containing profiles and special rules for every model available for the following factions, alongside magic items and unique spells:

- Orc and Goblin Tribes
- Warriors of Chaos
- Beastmen Brayherds
- Tomb Kings of Khemri

Each army list includes the Grand Army composition list for that faction, along with an introduction to the faction and a full description of each of the many characters and units it contains. Alongside this is a showcase of beautifully painted armies from the talented painters of the world-famous 'Eavy Metal team.

This is an expansion to *Warhammer: The Old World* - you'll need a copy of the *Warhammer: The Old World Rulebook*, available separately, to use the contents of this book.
